New period-style headlights for early cars

Headlights can look too “modern”

On early cars, some headlights simply look out of character, and are clearly of a later period. These new headlights are designed to look just like excellent examples of early units, They have been designed to work with either halogen or LED headlamp bulbs.

The domed-front lens uses modern technology combined with period patterning to give excellent focus and beam patterns while looking like they were made 50 years ago.

Three choices

To enable you to select the right level of performance vs cost, we can offer you three levels :-

Level One

Pair of period style headlights in presentation box with standard halogen bulbs £99.99+VAT

Level Two

Pair of headlights in presentation box with high power Classic Car LED headlight bulbs in period ivory white £199.99+VAT

Level Three

As above but with in-built LED automatic daytime running lights, to combine style with enhanced safety £299.99+VAT.

Hailing from Tolpuddle in Dorset, Win's racing career associated him with the XJ220. I first met Win in June 2012, when he agreed to become a patron of Xclusively Jaguar.

Win is an accomplished Jaguar racing driver, successful businessman, team manager, and winning driver of many cars in all forms of motorsport.

The farming community has provided us with a number of successful racers, but as far as I am aware, these have all been the sons of wealthy farmers, not the sons of farm labourers in tied cottages, and this real-life story about a farm labourers son who became a world class racing driver portrays the humdrum of everyday life, punctuated by tragedies, setbacks and triumphs along the way.

Tracing Win's racing history through his involvement with various teams and manufacturers, it also became obvious as to why Win's book has two sleeve options, his connections with Holden being as strong as those with Jaguar.

Some of Win's accomplished, high profile friends have contributed to this book, including Martin Brundle, Murray Walker and Lord March of Goodwood.

As everyone who meets him will confirm, Win is a gentleman and a truly delightful person, as reflected in the title of his biography
The remarkable life of the unassuming racer

Written by Spike Anderson of "Samuri" fame, who has known Win for many years, this A4 300 page quality hardback book features over 300 images, 281 in colour and 46 period photographs in monochrome.

SUPERB OLD WORLD COMFORT

NEW!

Improved sophisticated hazard warning light kit with night illumination and audible warning and visual display.

Evolutionary upgrade

When the original version of this hazard warning light system was launched in 2019, it quickly became popular for two main reasons. Firstly, it looked totally OE when installed, and secondly it was quick and easy to fit. Since then, it has been possible to incorporate new technology, so the challenge was to do this without making it difficult to install. Now this kit has an audible warning, a visual display, and an illuminated switch to make it quick and easy to locate and use in an emergency.

Quick and easy to fit

No installer, whether professional or private car owner, wants installation of equipment to be complicated and time-consuming, so this vital piece of safety equipment has only five connections to be made, and all wires are name-tagged so that constant reference to wiring diagrams is not needed.

New technology

In 2025, we developed a new breed of electronic hazard warning light flasher relay to work with all bulb types, LED or conventional. It was designed to cope with older cars where the battery can run flat if the hazards are on for a long time. This one will work all the way down to 5 volts, so it will keep the hazards going for twice as long as a conventional one. We also incorporated a sounder to reassure you that the hazards are on and the switch also flashes bright red to confirm the status. The kit comes with instructions and even connectors which can be opened and closed to enable you to tailor the kit to your car and prove the system is working and then use the permanent connectors of your choice

Costs

In spite of the many improvements, the cost of this kit has gone up by just £10.00 since the launch in 2019. It now costs £79.99+VAT and comes with a 5 year guarantee and tech support.

“All Round” Exterior Lighting Upgrade for early cars from Better Car Lighting

Revolutionary developments

In recent years, advances in the technology available to upgrade the lighting on early cars has leapt forward in leaps and bounds, with technically advanced LED bulbs that triple outputs and efficiency and also produce light of an appropriate colour, and self-flashing LED bulbs to make semaphore signalling arms useful as well as attractive. However, the biggest and most important change is the development of compact central control units that take care of tail lights, brake lights, front sidelights, flashing indicators all round, audible warning, visual display and integrated hazard warning lights. Using one of these as the foundation of an external lighting upgrades halves the installation time, greatly reduces the amount of space needed to locate components and massively improves reliability by simplifying wiring and slashing the number of connections needed.

At the front

The car sidelights can be converted to dual function warm white sidelights, which turn off and flash orange when you indicate. Whatever the style, we have a solution. The original car headlight bulbs can be upgraded to high power,

high efficiency LED bulbs, which will produce three times as much light, while reducing load by a whopping 60%. These will be a direct replacement, requiring no modifications. If your headlights are in poor condition, we can offer several styles of 7" units. (Not included).

At the back

Whatever the style of back lights on your car, we can equip you to transform them invisibly, so that tail and brake lights are much brighter and orange indicators will flash through the existing red lenses. We can, for a small extra charge, even build-in rear foglights.

Limited time-period offer

This complete kit of bulbs, control unit, etc. would typically cost over £600+VAT but until the last working day of 2026, it will be available at the discounted price of £499.99+

VAT to give more people the chance to see just how much difference this upgrade will make to their car, their safety and their motoring pleasure. Full tech support is included in this price.

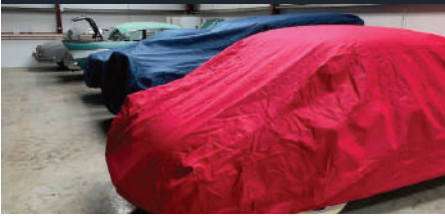

The whole system is fully guaranteed for five years (from date of purchase).
